Intraoperative Three-Dimensional Imaging in the Treatment of Acute Unstable Syndesmotic Injuries
Jochen Franke, MD, Jan von Recum, MD, Arnold J. Suda, MD, Paul Alfred Grützner, MD,
Klaus Wendt, MD

This article describes a common problem that all surgeons face so it is relevant. It made me think more about a something I thought I was good at and turned out I was not so good after all.

From a scientific prospective it is an observational study; it is clear and simple and does not make any attempts at making claims that cannot be substantiated. It made me think how we might be able to do a better job of ankle fractures.
