Disclaimer and Disclosure

Disclaimer
The material presented in this continuing medical education activity has been made available by the American Orthopaedic Foot & Ankle Society (AOFAS) for educational purposes only. This material is not intended to represent the only, nor necessarily the best, methods or procedures appropriate for the medical situation discussed, but rather is intended to present an approach, view, statement, or opinion of the authors or presenters, which may be helpful, or of interest, to other practitioners. Methods, techniques and procedures demonstrated and views and opinions expressed by speakers, presenters and faculty are on their own, and do not necessarily represent those of the AOFAS nor does presentation on the program represent or constitute endorsement or promotion by the AOFAS. The AOFAS expressly disclaims any warranties or guaranties, expressed or implied, and shall not be liable for damages of any kind in connection with the material, methods, information, techniques, opinions or procedures expressed, presented or demonstrated.

Disclosure Statement
AOFAS mandates all instructors, planners and other individuals in a position to control or influence the content of an educational activity to disclose all relevant financial relationships or affiliations during the past 12 months with any commercial interest. All identified conflicts of interest must be resolved and the education content vetted by the AOFAS for fair balance, scientific objectivity and appropriateness. Any and all disclosures will be provided in the Final Program which will be distributed at the meeting to all program participants.

FDA Statement
Some drugs or medical devices demonstrated at this meeting have not been cleared by the FDA or have been cleared by the FDA for specific purposes only. The FDA has stated that it is the responsibility of the physician to determine the FDA clearance status of each drug or medical devices he or she wishes to use in clinical practice. AOFAS policy provides that “off label” uses of a drug or medical device may be described in its CME activities so long as the “off label” use of the drug or medical device is also specifically disclosed (i.e. it must be disclosed that the FDA has not cleared the drug or device for the described purpose). Any drug or medical device is being used “off label” if the described use is not set forth on the products approval label.

Faculty / Planner Disclosure Declaration
As an Accreditation Council for Continuing Medical Education (ACCME) provider, AOFAS has the obligation to ensure the delivery of education that is balanced and free of commercial bias. To achieve this, it is the policy of the American Orthopaedic Foot & Ankle Society that all CME related Board, committee members (“planners”), faculty and appropriate staff disclose in writing to the learners all financial relationships during the past twelve months with any commercial interest that may insert bias. A “commercial interest” is any entity producing, marketing, re-selling, or distributing health care goods, or services consumed by, or used on, patients. In addition to faculty members, commentators from the floor are charged with verbally disclosing any interests immediately prior to speaking. Any and all disclosures are provided in this final program that is distributed at the meeting to all program participants. In accordance with AOFAS policy faculty participation in this educational activity will be predicated upon timely submission and review of AOFAS disclosure. An individual who refuses to disclose relevant financial relationships will be disqualified from being a planning committee member, a teacher, or an author of CME, and cannot have control of, or responsibility for, the development, management, presentation or evaluation of the CME activity. Non-compliance will result in a faculty member being stricken from the program.
An indication of the participant’s disclosure appears after his or her name as well as the commercial company or institution that provided the support. AOFAS does not view the existence of these disclosed interests or commitments as necessarily implying bias or decreasing the value of the author’s participation in this activity.

In addition to ensuring that presentations be free of bias, faculty members are required to ensure that all material presented and discussed will be based on best-available evidence.
